

DCMTK - Bug #1022

Chocolatey installer for DCMTK does not support clean upgrade

2022-05-10 09:33 - Marco Eichelberg

Status:	Closed	Start date:	2022-05-10
Priority:	Normal	Due date:	
Assignee:	Marco Eichelberg	% Done:	100%
Category:	Library and Apps	Estimated time:	0:00 hour
Target version:	3.6.8	Compiler:	
Module:			
Operating System:	Windows		
Description			
<p>The chocolatey installer for DCMTK supports installation and deinstallation of DCMTK. However, when "choco upgrade" is run, the new version of the toolkit is installed, but the old binaries are not deleted, causing "Shimgen" to first create Shims for the old version, and then to overwrite these with Shims pointing to the new version.</p> <p>The upgrade operation should remove the old binaries before installing the new ones.</p>

Submitted a new Chocolatey package 3.6.7.1 on 2022-07-13 that should fix this problem.
Whether it works as expected can only be seen when we publish a new DCMTK version, so that a proper "choco upgrade" to new binaries becomes possible.
