

DCMTK - Feature #1035

Implement character set support for matching keys in wlmcpfs

2022-09-28 12:54 - Marco Eichelberg

Target version:		Compiler:	
Module:	dcmwlm		
Operating System:			
Description DCMTK's Worklist SCP, wlmcpfs, does not have proper support for character set conversion and matching of characters encoding in anything other then ASCII or ISO Latin 1 (ISO_IR 100). The matching algorithms from dcmqrscp should be ported to the worklist server so that, for example, a query in Latin-1 can match against a worklist file encoded in Unicode, or vice versa.
