

DCMTK - Bug #1098

Harmonize directory for installation of CMake files between Posix and Windows

2023-12-13 09:01 - Marco Eichelberg

Status:	New	Start date:	2023-12-13
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Library	Estimated time:	0:00 hour
Target version:	3.7.1+	Compiler:	
Module:	CMake		
Operating System:			

Description

During installation (make install), CMake creates and installs four files that are intended to allow a discovery of DCMTK from other CMake projects using find_package().

Currently, these files are installed in different locations on Posix and Windows platforms, for no obvious reason. The responsible code is in CMake/dcmTkPrepare.cmake:

```
if (UNIX)
  set (DCMTK_INSTALL_CMKDIR "${CMAKE_INSTALL_LIBDIR}/cmake/dcmTk")
elseif (WIN32)
  set (DCMTK_INSTALL_CMKDIR "cmake")
endif()
```

This should be harmonized, probably using the Posix/Unix choice of directory.
