DCMTK - Feature #1102

DICOMDIR generation code should not allow draft SOP Classes by default

Description

Similar to the following command line option, dcmgpdir/dcmmkdir (and the underlying class) should only support draft SOP Classes (from Supplements that were never approved for "Final Text") if a corresponding option is enabled:

```
+Nrs  --allow-retired-sop      allow retired SOP classes defined in previous
                               editions of the DICOM standard
```
