

DCMTK - Bug #1145

oflog seems to "lose" log files when renaming

2025-01-17 15:27 - Marco Eichelberg

Status:	New	Start date:	2025-01-17
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Library	Estimated time:	0:00 hour
Target version:		Compiler:	
Module:	oflog		
Operating System:	Windows		
Description <p>The oflog logger can be configured to create a new log file once a certain file size has been reached and to rotate file names with a selectable number of log files to be kept.</p> <p>Apparently during the renaming process that occurs when a new log file is started, files may get lost somehow, at least on Windows. See DCMTK forum posting https://forum.dcmtd.org/viewtopic.php?t=5411.</p> <p>The attached sample code was posted to the DCMTK forum. Note that it is intended for Windows and will require Boost to be present.</p>
