

DCMTK - Feature #1146

Add character set options to dcm2json

2025-01-20 15:21 - Marco Eichelberg

Status:	New	Start date:	2025-01-20
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Application	Estimated time:	0:00 hour
Target version:		Compiler:	
Module:	dcmdata		
Operating System:			
Description			
It would also be nice to have the same character set options in dcm2json that are already provided by dcm2xml:			
specific character set: +Cr --charset-require require declaration of extended charset (def.) +Ca --charset-assume [c]harset: string assume charset c if no extended charset declared +Cc --charset-check-all check all data elements with string values (default: only PN, IO, LT, SH, ST, UC and UT)
