

DCMTK - Feature #1157

Add support for the version information resource to Windows executables and shared libraries

2025-05-08 11:19 - Jörg Riesmeier

Target version:		Compiler:	
Module:	all		
Operating System:			
Description			
It would be nice to have version and copyright information added to DCMTK's EXE and DLL files, i.e. on Windows systems. This feature could be added by linking a version information resource (VERSIONINFO) to the respective files.			
This has already been implemented successfully for a project that is based on the DCMTK. The current version information is added to the resource file (template) by CMake's <code>configure_file()</code> command.
