

DCMTK - Feature #1163

Add "dcmTk" command line tool and man page

2025-10-02 09:29 - Marco Eichelberg

Target version:		Compiler:	
Module:	dcmdata		
Operating System:			
Description Add a command line tool "dcmTk" and a corresponding man page. The tool should just print a help text providing a list of all DCMTK tools and their respective function, as an overview. As an additional feature, we could offer something like "dcmTk dcmdump infile.dcm", which would call dcmdump, with all parameters forwarded.

For the second part of the "feature request", I would suggest something like "dcmTk dump <filename> <options>" or "dcmTk modify ...", "dcmTk convert ...", "dcmsend send ...", etc.
