

DCMTK - Bug #412

Fehlerhafte Logger-Konfigurationsdatei führt zum Absturz

2012-05-10 10:04 - Jörg Riesmeier

Status:	Closed	Start date:	2012-05-10
Priority:	High	Due date:	
Assignee:	Uli Schlachter	% Done:	0%
Category:		Estimated time:	0:00 hour
Target version:		Compiler:	
Module:	oflog		
Operating System:			
Description			
Aus einer E-Mail von Heyo Spekker:			
anbei die logfile.cfg, die direkt zum Absturz führt. Grund ist, dass ich bei der Angabe des Conversion Patterns "console.layout" statt "logfile.layout" geschrieben hatte.			

History

Hier der Call Stack für den Aufruf von dcm2pnm mit der besagten Logger Config auf caesar:

```
Starting program: /export/home/joergr/source/dcmtd/dcmimage/apps/dcm2pnm -lc ~/tmp/logfile_err.cfg ~/data/dicom/images/TROSTEN.dcm -o
[Thread debugging using libthread_db enabled]

Program received signal SIGSEGV, Segmentation fault.
