

DCMTK - Feature #415

Log-Ausgabe des Source-Dateinamens enthält u. U. den kompletten Pfad

2012-05-10 10:23 - Jörg Riesmeier

Status:	Closed	Start date:	2012-05-10
Priority:	Normal	Due date:	
Assignee:	Uli Schlachter	% Done:	0%
Category:	Library	Estimated time:	0:00 hour
Target version:		Compiler:	
Module:	oflog		
Operating System:			
Description			
Die Ausgabe unter Windows sieht z. B. wie folgt aus:			
<pre>2012-05-09 16:24:27.105 DEBUG - wlcedb / ..\..\..\dcmtdk_all_20120509\dcmwlmxl\apps\wlcedb.cc:308 - \$dcmtk: wlmcpdb v3.6.1 2012-05-09 \$ 2012-05-09 16:24:27.105 DEBUG - wlcedb / ..\..\..\dcmtdk_all_20120509\dcmwlmxl\apps\wlcedb.cc:308 -</pre>			
Unter Linux erscheint nur bei Header-Dateien der relative Pfad zur jeweiligen Datei:			
<pre>2012-05-10 10:21:29.622 DEBUG - dcmimgle - didocu.cc:125 - transfer syntax of DICOM dataset: Little Endian Explicit (1.2.840.10008.1.2.1) 2012-05-10 10:21:29.622 DEBUG - dcmimgle - ../include/dcmtdk/dcmimgle/diinpvt.h:434 - reading uncom pressed pixel data completely into memory 2012-05-10 10:21:29.623 DEBUG - dcmimgle - ../include/dcmtdk/dcmimgle/diinpvt.h:499 - convert input pixel data: case 2a (simple mask) 2012-05-10 10:21:29.628 DEBUG - dcmimgle - diimage.cc:612 - detach pixel data 2012-05-10 10:21:29.632 INFO - dcm2pnm - dcm2pnm.cc:1540 - cleaning up memory</pre>			
Frage: Soll das so bleiben? Es sieht ja irgendwie unschön aus ...			

History

#1 - 2012-06-20 13:53 - Jörg Riesmeier

Man könnte natürlich die letzte Namenskomponente (nach evtl. vorhandenem PATH_SEPARATOR) von ' __FILE__ ' abtrennen, etwa mit strrchr() oder OFStandard::getFilenameFromPath().

#2 - 2012-08-24 12:01 - Uli Schlachter

- File just_filename.patch added

The attached patch makes oflog only print the file name and not the full path, as given by FILE. I'm unsure about committing this, because this would be one more difference between our code and upstream log4cplus. I'll see if something like this can be added directly to log4cplus.

#3 - 2012-09-04 09:06 - Jörg Riesmeier

- Category set to Library
- Status changed from New to Assigned

It seems that there is already an official solution for this (using pattern "%b"):
http://sourceforge.net/tracker/?func=detail&aid=3537695&group_id=40830&atid=429076

#4 - 2013-01-15 13:18 - Uli Schlachter

- Status changed from Assigned to Closed

Now that we use log4cplus 1.1.0, pattern %b is available and can be used.
