DCMTK - Bug #470

MSC6 weirdness in dcmnet/scppool.h

2013-01-15 12:07 - Uli Schlachter

Status:	Closed		Start date:	2013-01-15
Priority:	Low		Due date:

Target version:	3.6.1+			
Module:	dcmnet		Compiler:	
Operating System:				

Description

I built the toolkit as DLLs. dcmnet compiled fine, but while compiling dcmnet_tests, the following error occured:

dcmnet/include/dcmtk/dcmnet/scppool.h(266) : error C2899: typename cannot be used outside a template declaration

No idea what MSC6 suddenly doesn't like anymore. It did not complain while building dcmnet itself. :-/

Ideas, Anyone?

History

- Assignee changed from Michael Onken to Jan Schlamelcher

#2 - 2013-04-08 18:09 - Jan Schlamelcher

- Status changed from New to Feedback

- % Done changed from 0 to 100

Should be fixed now. It seems that typename != typename. One appearance of typename had to be replaced by "OFTypename", so this appearance is removed when compiling with VC6.

#3 - 2013-08-15 15:31 - Jörg Riesmeier

- Target version changed from 3.6.1 to 3.6.1+

#4 - 2015-09-25 12:10 - Jörg Riesmeier

- Status changed from Feedback to Closed

Since we dropped support for VC6, this issue should be solved in any case.
