<b>Target version:</b>	3.6.2	<b>Compiler:</b>	
<b>Module:</b>	dcmnet		
<b>Operating System:</b>			
<b>Description</b>			
It would be nice to have two dedicated methods for closing an association (e.g. as in DcmStorageSCU):			
<ul style="list-style-type: none"><li>• releaseAssociation() -&gt; closeAssociation(DCMSCU_RELEASE_ASSOCIATION);</li><li>• abortAssociation() -&gt; closeAssociation(DCMSCU_ABORT_ASSOCIATION);</li></ul>			
Maybe, the current closeAssociation() method should be moved to the "protected" section since DCMSCU_PEER_REQUESTED_RELEASE and DCMSCU_PEER_ABORTED_ASSOCIATION are probably only used by derived classed. However, this would break existing code.			

History
