DCMTK - Feature #570

Check whether the use of DcmSequenceOfItems::getItem(index) could be enhanced (or avoided?)

Operating System:			

Description

The same check as described in #569 should be performed on all other DCMTK modules, e.g. when retrieving the pixel items from the pixel sequence, the JPEG decoder classes also use getItem(i) in a for-loop... alternatively, the implementation of DcmSequenceOfItems::getItem(index) should be enhanced.
