

DCMTK - Bug #653

Use EWM_createNewMeta as the default for saveFile() and write() method?

2015-08-10 18:51 - Jörg Riesmeier

| Target version: | 3.6.6 | Compiler: | |
| Module: | dcmdata | | |
| Operating System: | | | |
| Description | | | |
| It seems to be a bad idea to <i>update</i> the file meta information only (when writing a DICOM file, which was read from file). | | | |
| See: https://groups.google.com/d/msg/comp.protocols.dicom/gGF0oa7b7xE/2a6gTBRIBgAJ | | | |
| Also DcmFileFormat::checkMetaHeaderValue() does not modify element values if the VR is incorrect... this code also needs some revision. | | | |
