

DCMTK - Conformance #682

Check whether CP-1529 (Private Creator once per group) requires any changes to "dcmdata"

2016-03-21 12:21 - Jörg Riesmeier

Status:	Closed	Start date:	2016-03-21
Priority:	Low	Due date:

Target version:		Compiler:	
Module:	dcmdata		
Operating System:			
Description			
CP-1529 clarifies: "A Private Creator identifier may be used only once within a Group; reserving multiple blocks of Elements in the same Group with the same identifier is not allowed."			
The private tag mechanism with the "dcmdata" module could report a warning if the same Private Creator is (mis)used in the above-mentioned way.

The team agrees that dcmdata (as the low level parser in DCMTK) should allow programmers to create broken files. This also allows to read broken files.
