

DCMTK - Feature #841

Change name of enums/constants for retired transfer syntaxes

2018-08-02 17:39 - Jörg Riesmeier

Status:	New	Start date:	2018-08-02
Priority:	Low	Due date:

Target version:		Compiler:	
Module:	dcmdata and others		
Operating System:			
Description For retired DICOM attributes the infix "RETIRED_" is used in the name of the associated constants. The same approach could/should also be used for retired transfer syntaxes, i.e. for the UID_xxx constants and the EXS_xxx enums. NB: The associated string names in uidNameMap[] should not be changed since this would cause dump2dcm to reject existing (older) textual dumps.
