

DCMTK - Bug #899

findscu does not properly set exit codes

2019-09-26 10:44 - Jörg Riesmeier

Status:	Closed	Start date:	2019-09-26
Priority:	High	Due date:	
Assignee:		% Done:	100%
Category:	Application	Estimated time:	0:00 hour
Target version:	3.6.5	Compiler:	
Module:	dcmnet		
Operating System:			
Description			
In case of a network error such as...			
 E: Association Request Failed: 0006:031b Failed to establish association E: 0006:0317 Peer aborted Association (or never connected) E: 0006:031c TCP Initialization Error: Connection refused			
 ... findscu returns with exit code 0, which is certainly not what a user expects (e.g. when starting findscu from a script).			
 The reason for this (wrong) exit code is that the "cond" variable is not evaluated after calling "cond = findscu.performQuery(...);". Also the return value of dropNetwork() and other methods is not checked to set the exit code.			

History
