

DCMTK - Feature #929

echoscu, findscu et al. do not check the DIMSE Status Code

2020-04-06 17:06 - Jörg Riesmeier

Status:	New	Start date:	2020-04-06
Priority:	Normal	Due date:

Target version:	3.7.1+	Compiler:	
Module:	dcmnet		
Operating System:			
Description When using echoscu, findscu or other SCU tools from a script, it would be useful (if not needed) that the tool would check the returned DIMSE Status Code for errors or failures. Currently, most of the tools always return "success" (exit code 0) even if there was an error during the DICOM communication.
