DCMTK - Feature #976

Remove third party (library) dependencies of private modules from (public) DCMTK

2021-03-26 14:06 - Jan Schlamelcher

Description

Currently both DCMTK's private extension modules and the publicly available FOSS part of DCMTK share the same file for handling third party dependencies (3rdparty.cmake). Instead, respective dependencies should be moved to some file that is only included from the respective private module. This currently introduces "fake" dependencies to OpenJPEG and libsndfile for the public DCMTK.
